

# Breathing Air Trailer

MADE IN THE USA

## *"New Design"*

**Compressor • Class 2 Containment • Air Panel • Air Storage**

Hypres Equipment has developed a new breathing air trailer design. The all in one configuration provides the system to be one footprint, providing more square footage in the trailer. The new design also eliminates unnecessary tubing throughout the trailer.

### Standard Features:

- Gas or Diesel Driven Compressor
- Dual Position Class 2 Containment
- Complete Air Management Panel
- (4) DOT or ASME Air Storage Cylinders

### Breathing Air System Options:

- Dual Drive Compressor
- CO/Moisture Monitor
- High or Low Pressure Hose Reels
- SCBA Storage Rack
- Generator (Interior or Tongue Mounted)
- Oxygen Systems are available

### Trailer Options:

- Single or Dual Axle
- Retractable Awning
- Rear Ramp Door
- Interior/Exterior Electrical Options
