

Manufacturer of High-Pressure Breathing Air Systems

CNG Compressed Natural Gas Compressor – End of Life Notice

December 6, 2019

Dear Customers,

As many of you know, Hypres Equipment ceased production of new CNG compressor systems in March of 2015. Over the past few years, we have sold repair parts, offered advice and have even repaired a few compressors at our location.

This letter provides notice that all CNG systems produced by Hypres Equipment have been assigned “End of Life” status and will no longer be supported by Hypres Equipment effective December 31, 2019.

Certain repair parts, consumable items and documentation will be available for sale to service technicians and/or end users after 12/31/19 until supplies are exhausted. When these supplies are exhausted, they will not be replenished.

Please know that we remain grateful for your original purchase of a CNG compressor from us and that we did not make this decision lightly. However, we are unable to continue to support the CNG compressor product line and meet the needs of our customers and the ever-changing breathing air industry.

Sincerely,

David Bailey
President
Hypres Equipment
